

Make your own Flipbooks

1. Cut enough pieces of paper to make your flipbook.
2. Start with the last page of the book and work from the back to the front of the book. This way, you can use the drawing you just completed as a guide for the next picture. Draw each picture by following the numbers.
3. Simplify your drawing, especially if you are a beginner or this is one of your first times.
4. Make sure you always overlap your drawing with the next one. This makes the movement smooth. In fact, never advance more than 2 mm from one drawing to the next.
5. If your "character" is more complex, make a template or stencil that you can trace, from one drawing to the next.

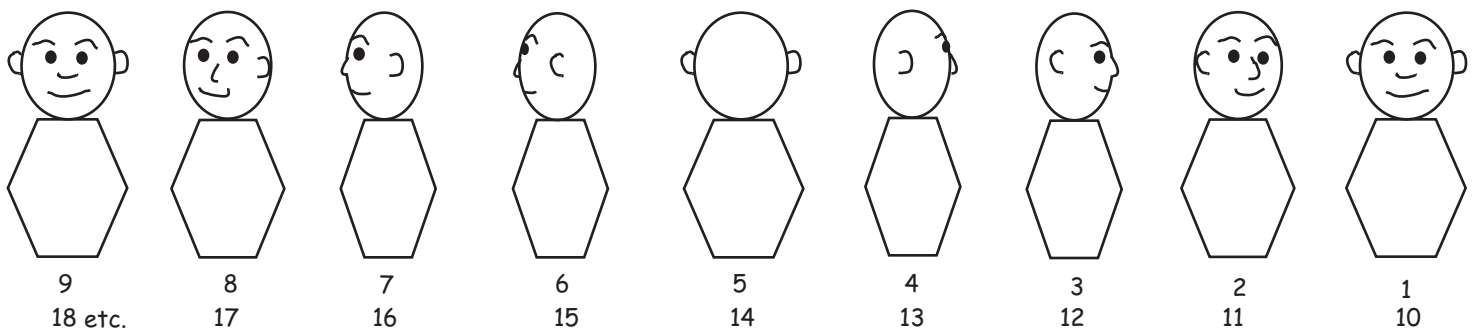

Ball Bouncing

Fish Swimming

Head turning

Pig walking
